

October 10, 2019

Dear Greta,

You are one of my biggest idols!

My name is Willow Phelps, I am 12 years old and in 7th grade. I've been attending the climate strikes since last year and have seen them grow to millions of people!

We all know by now that factory farming, fossil fuels and single use plastics are damaging the earth.

But what's missing?

HUMAN OVERPOPULATION!

This year at the school strike for climate change in NYC, there were THOUSANDS of kids protesting, and millions of kids protesting world-wide. What if all of those kids go on to have large families?

If everyone in the world lived as we do here in the United States, we would need 4 earths to support humanity. T

A future with smaller families is the best way to protect the environment, animals and OUR future.

Greta, I hope you will think about human overpopulation and the need for better family planning to protect the earth.

Visit [Having Kids.org](http://HavingKids.org) for more information!

I hope to meet you one day. Thank you for all that you do.

Sincerely,

Willow Phelps, age 12
